

Gogo C1

The easiest and fastest way to maintain your legacy ATG connectivity

The Gogo C1 serves as a form-fit* replacement for legacy ATG systems (ATG 1000, 2000, 4000, and 5000), preparing you for LTE transition. The Gogo C1 allows you to maintain connectivity through network transition with minimal downtime and changes to your existing installation.

FEATURES

Maintain your current connectivity experience

- Enables email, light web browsing, texting, and voice calls
- Coverage in the contiguous U.S., plus portions of Canada and Alaska
- The existing legacy ATG system tray, omni-directional antennas, wires, cabling, connectors, rail mount kit installation and cabin telecommunications router (CTR) can be reused
- The Gogo C1 power requirements, power pins and ARINC 429 labels are the same as the legacy ATG system

*Not every legacy ATG installation is the same and there may be minimal re-pinning required. Please have your Dealer or maintenance personnel consult our Installation Manual.

COST & CONFIGURATION

CONFIGURATION	MSRP	INSTALL REBATE	PART NUMBER
Gogo C1	\$35,000**	\$35,000***	P62000-001

**System price does not include installation. Contact a Gogo authorized Dealer for installation cost.
